-  Survey Monument

HARVEST REGULATIONS ON REVERSE SIDE

R.P.L. = Red Paint Lines

Scale: 1" = 1/4 mile

Harvest Regulations

1. **HARVEST BLOCK A (21 acres):** Jack Pine and Black Spruce Clearcut with Reserves. Harvest all trees over 1-inch in diameter EXCEPT those marked with green paint. Non-merchantable trees must be cut concurrent with the harvest of merchantable wood. Harvest activities shall only occur from November 1 to March 1 and must occur under exceptionally dry or frozen-ground conditions unless the contractor demonstrates the ability to operate on top-wood without rutting or otherwise damaging the stand. Trees felled over red paint lines must be pulled back into sale area before being limbed and topped. If whole tree harvesting, contractor must retain limbs and tops from one of every ten average-sized trees.
2. **HARVEST BLOCK B (23 acres):** First thinning of Red Pine plantations. Harvest all trees marked with orange paint. Do Not Cut unmarked trees. Trees marked with two orange dots represent main access routes into the stand. Harvest activities shall only occur from July 1 – April 30 when ground is sufficiently dry or frozen. Shortwood skidding is required. Do not fell trees or operate outside red paint lines/stand boundaries. Biomass harvesting is NOT permitted in this harvest block.
3. From May 15th to August 15th, all cut pine products must be removed from the sale area within 14 days of being cut.
4. All dead snags must be left uncut unless they pose a hazard to the harvesting operation.
5. Contractor must adhere to Timber Sale Contract rutting standards and Wisconsin's Best Management Practices for Water Quality.
6. All roads and landings must be cleared and leveled upon sale completion. These areas are sufficiently served by existing trails; therefore, no new roads will be allowed to be constructed.
7. Access to Harvest Block A uses a state-funded ATV/snowmobile trail. This trail must be kept free of logging debris and equipment. Plowing during the snowmobile season must be done so as to leave snow cover on the trail at all times.
8. Heart Lake Road also serves as an ATV/UTV Route. This road must be kept free of logging debris and equipment. Any landings along this road must be located at least 200 feet from Tamarack Creek and on the same side as the harvest operation.
9. If the Natural Opening adjacent to Harvest Block A is utilized as a landing area, the landing must be located near the edge of the opening, soil disturbance must be minimized, and all logging debris must be removed from the opening prior to sale close-out.
10. Trees felled across the blue-marked property lines must be pulled back into the sale area before being limbed and topped. All slash must be pulled away from the property line to allow unencumbered access to the property lines for maintenance.
11. Please refer to the Timber Sale Contract for a complete list of harvest regulations.

VILAS COUNTY FOREST TIMBER SALE MAP

Tract: 12-19

Compartment/Stand: 2/5

Township: Cloverland

Legal Description: SESW, Sec. 20, NWNW,
Sec. 29, T40N - R9E.

Sale No. 1006

Common Name: Whiff

Contractor:

Date Sold:

Date Completed: _____

Total Acres: 31-acres

Harvest Area: 31-acres

Forester: Oftedahl, Jochimsen

Estimated Volumes:

Red Oak 250 Tons

Oak Logs 30 MBF

White Pine¹ 60 Tons

Red Maple 60 Tons

¹Contains 8 MBF of Logs

-  Sale Area
-  Wildlife Openings
-  County Forest Roads
-  Township Roads
-  Forest Trails
-  ATV/Snowmobile Trails

R. P. L. = Red Paint Lines

Scale: 1" = 1/4 mile

Harvest Regulations:

1. **Red Oak Thinning:** Harvest all trees marked with orange paint. Do Not Cut any unmarked trees. Do not cut snags unless they pose an immediate threat to logging contractors during harvest operations. If cut, Leave snags where they fall. Shortwood skidding only.
2. **Oak Wilt Restriction:** No roadwork, skidding, or cutting from April 15 through July 15.
3. During the period from May 15 through August 15, the contractor must remove all cut pine products from the sale area within 14 days of cutting.
4. Avoid damage to residual trees including advanced regeneration. This reduces the risk of spreading disease and degrading future crop trees. Excessive rutting and/or excessive damage to residual trees will cause temporary closure of harvesting operations. Do not damage relic fire scar stumps/trees.
5. The contractor must use existing roads and Hunter Hiking Trails to access the sale. Existing trails provide sufficient access for the project; new road construction is prohibited. All roads and landings must be cleared and leveled upon sale completion. Hunter Hiking Trails must be left in an equal or better condition than pre-harvest that is conducive for mowing post-harvest.
6. A state funded ATV/snowmobile trail uses Snipe Lake Fire Lane and Wood Duck Lake Road. During the snow season, the contractor must keep snowmobile trails free of logging debris and equipment. When plowing during this time the contractor must leave snow on the trail at all times.
7. Refer to the Timber Sale Contract for all harvest regulations.

Jack Pine	90	110
Balsam Fir	70	90

¹ Contains 18 MBF of White Pine Logs.

² Contains 17 MBF of Red Pine Logs.

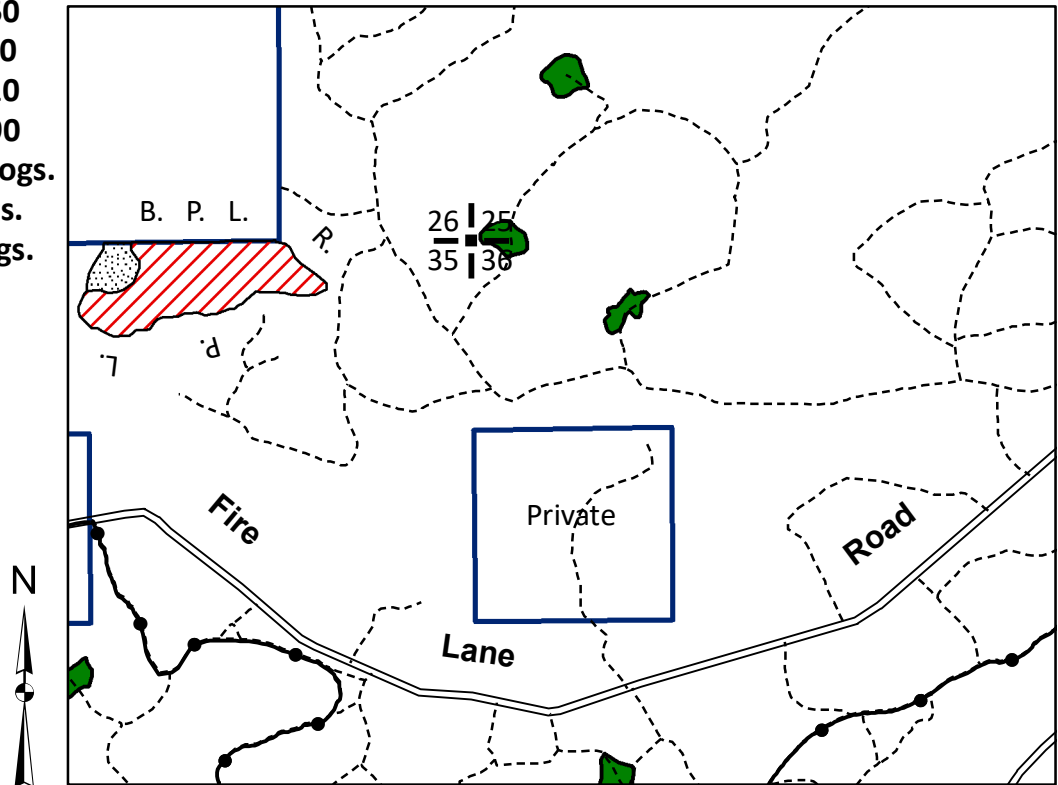

³ Contains 3 MBF of Red Maple Logs.

-  Aspen Coppice
-  Green Tree Retention
-  Wildlife Openings
-  Township Roads
-  Forest Trails
-  Snowmobile Trails

B. P. L. = Blue Paint Lines

R. P. L. = Red Paint Lines

Scale: 1" = 1/4 mile

Harvest Regulations:

- Aspen Coppice:** Cut all trees 1" and greater. All non-merchantable trees having a diameter of 1" and greater must be cut concurrent with the harvest of merchantable wood. Leave all dead trees standing unless they create a hazard during operations. If cut, leave snags where they fall. If whole tree, harvest every tenth tree to a four-inch top diameter leaving the tops scattered throughout the project area.
- Do not fell trees outside of the harvest area. Excessive rutting and/or excessive damage to residual trees will cause temporary closure of harvesting operations.
- All trees felled across property boundary lines must be pulled back into Vilas County Forest property and the sale area before being limbed and topped. All slash must be pulled away from the boundary line to allow unencumbered access to the property lines for maintenance.
- During the period from May 15 through August 15, the contractor must remove all cut pine products from the sale area within 14 days of cutting.
- The contractor must use existing roads and trails to access the sale. Existing trails provide sufficient access for the project; new road construction is prohibited. All roads and landings must be cleared and leveled upon sale completion.
- Refer to the Timber Sale Contract for all harvest regulations.

HARVEST REGULATIONS ON REVERSE SIDE

Harvest Regulations:

1. Red Pine 1st Thinning: Unmarked thinning. Operator must cut every 3rd row or cut one tree leave two. Cut all aspen containing 1 stick or more. Leave all dead trees standing unless they create a hazard during operations. If cut, leave snags where they fall. Operations are restricted to plantation. Boundaries are Red Paint Lines, Blue Paint Lines, and natural boundaries (wetlands).
2. Spruce Clearcut: Harvest all merchantable and non-merchantable trees with a diameter greater than 1 inch, except cedar. Leave all dead trees standing unless they create a hazard during operations. If cut, leave snags where they fall. Harvesting is restricted to frozen ground conditions. Contractor must operate without rutting.
3. McLeod Lake Road: Harvest all trees marked with orange paint along McLeod Lake Road, south of the Blue Paint Line to the intersection of Star Lake Road. Roadways and trails shall be kept free from brush and waste wood resulting from operations. No Harvest operations from April 15 to July 15.
4. During the period from May 15 through August 15, the contractor must remove all cut pine products from the sale area within 14 days of cutting.
5. Avoid damage to residual trees including advanced regeneration outside the harvest areas. This reduces the risk of spreading disease and degrading future crop trees. Excessive rutting and/or excessive damage to residual trees will cause temporary closure of harvesting operations.
6. Contractor must use existing roads and trails to access the sale. Existing trails provide sufficient access for the project. Decking on town roads is prohibited. Construction of landings is subject to advanced approval and on-site inspection by Vilas County Forestry staff. All roads and landings must be cleared and leveled upon sale completion.
7. All trees felled across property boundary lines and wetlands must be pulled back into Vilas County Forest property and the sale area before being limbed and topped. All slash must be pulled away from the boundary line to allow unencumbered access to the property lines for maintenance.
8. Refer to Timber Sale Contract for all policies and Harvest Regulations.

Scale: 1" = 1/4 mile

Coppice Harvest Area

Township Roads

Disabled Hunter Access Trail

Forest Trails

Power Line

Survey Monument

R.P.L.

Red Paint Lines

Harvest Regulations:

1. **COPPICE HARVEST:** Harvest all trees greater than 1" DBH EXCEPT those marked with green paint. Non-merchantable trees must be cut concurrent with merchantable wood. Leave all dead trees standing unless they create a hazard to harvesting operations. If cut, leave snags where they fall.

2. **OAK WILT:** No roadwork, skidding, or cutting permitted from April 15 to July 15.

3. From May 15 to August 15, cut pine products must be removed from the sale area within 14 days of harvest.

4. Harvest areas are bounded by red paint except where they follow trails or powerlines. Trees felled across red lines must be pulled back into the sale area before being limbed and topped. Damage to residual trees must be avoided to reduce the risk of spreading disease and degrading the stand.

5. Harvest under sufficiently dry or frozen-ground conditions. Contractor must adhere to Timber Sale Contract rutting standards and Wisconsin's Best Management Practices for Water Quality.

6. The trail system into and through the sale area includes the Vilas County Disabled Hunter Access Trail - excavating will not be allowed on this trail, and hauling during the 9-day gun-deer season is prohibited. This area is sufficiently served by existing trails, therefore no new roads will be allowed to be constructed. Hunter Hiking Trails must be left in a condition conducive for mowing post-harvest. All roads and landings must be cleared and leveled upon sale completion.

7. Please refer to the Timber Sale Contract for a complete list of harvest regulations.

VILAS COUNTY FOREST TIMBER SALE MAP

Tract: 9-21

Compartment/Stand: 3/10

Township: Cloverland

Legal Description: SENE, NESE Sec. 16 T40N R9E

Estimated Volumes:

Aspen 730 Tons

Fir 610 Tons

Forester: Oftedahl

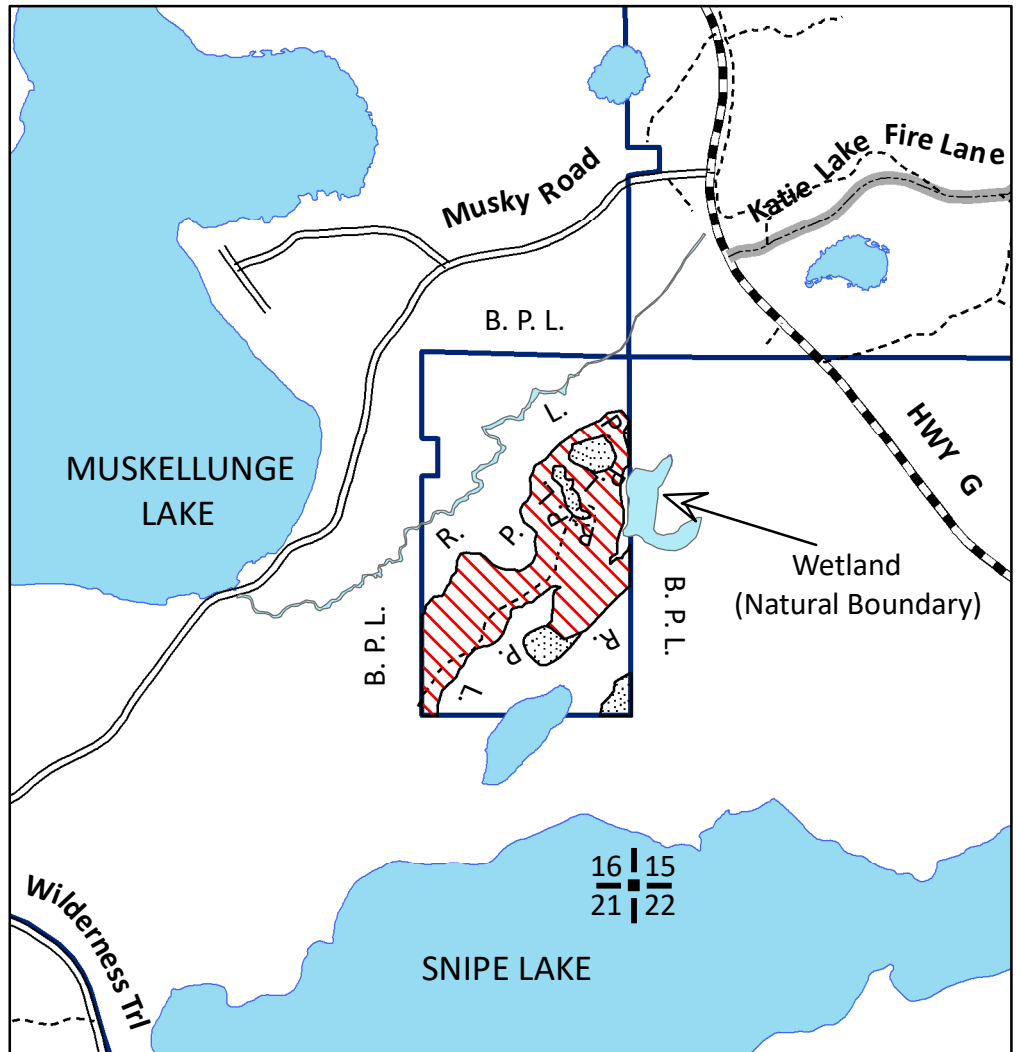

R. P. L. = Red Paint Lines

B. P. L. = Blue Paint Lines

P. P. L. = Purple Paint Lines

Scale: 1" = 1/4 mile

Harvest Regulations:

1. The contractor is responsible for obtaining access from private landowners to access the timber sale. Harvest activities shall only occur from April 1 to August 1. Harvesting must occur under dry or frozen-ground conditions unless the contractor demonstrates the ability to operate on top-wood without rutting or otherwise damaging the stand. In all likelihood, harvest will be restricted to frozen-ground conditions unless the ground is exceptionally dry to support fall harvest operations.
2. **Sale Area:** Cut all trees 1" and greater. All non-merchantable trees having a diameter of 1" and greater must be cut concurrent with the harvest of merchantable wood. Leave all dead trees standing unless they create a hazard during operations. If cut, leave snags where they fall. No harvest operations allowed April 1 to August 1.
3. The sale area may be wet at times throughout the year. If rutting occurs harvesting will be limited to dry and frozen ground conditions, or when there is adequate snow coverage.
4. Avoid damage to residual trees. This reduces the risk of spreading disease. Excessive rutting and/or excessive damage to residual trees will cause temporary closure of harvesting operations.
5. Refer to the Timber Sale Contract for all harvest regulations.
